What Patients are Saying...

I've lost weight and I have no digestion problems. I have more energy, no colds, my immune system is better and my blood pressure is down.

-Mena M.

Improvements I have noticed: skin, hair, complexion, anxiety level, self-assurance, improved digestive system, increased energy, overall health, better eating habits, and better health awareness.

-Nicole M.

I have lost weight and reached my goal! I have much more energy, fewer headaches, etc. Another big point is antibiotic use. I have not needed an antibiotic for months, and that is wonderful. No more hospital admissions, sleepless nights, etc. My eldest child even asks for his supplements.

-Suzie A.

Over the last 2 years, I have noticed an improvement in my joint pain, intestinal disorder, cholesterol, weight loss and blood pressure. Before, I was using a lot of anti-inflammatory drugs, but since I have been using the protocol, I have not needed to use any of those drugs. I have more energy than I have had in years.

-Evelyn A.

My all around health is better in a short amount of time.

-Nancy L.

I have much more energy, weight loss, more confidence, and feel better overall. I am anxious for bimonthly appointments and I do not mind knowing what else can be found wrong with me, because I know we will take care of it.

-Melanie D.

The doctor has helped me to address nutritional issues at this stage of my life as well as certain health issues of concern such as migraine headaches, stress, cholesterol, and weight concerns. As well as generalized health improvement.

-M.G.

Within one year of seeing Dr. Parkes, I have noticed many changes in my body: scars have peeled, lumps have disappeared, my hernia has disappeared, along with the hernia in my belly button. My hair grows like crazy, my nails are stronger, mental attitude has improved and I even went from a size 44C bra to a 38C on the second hook.

-C.G.

I have been able to watch my diet more carefully, eat better and healthier, and have become aware of "bad foods." I have lost 12 pounds since I started and my indigestion concerns are much improved.

-Susan G.

For several years I felt extremely tired all the time. I had no motivation or stamina to get things done. Sometimes, I would be so tired I couldn't focus or concentrate on anything. I also had problems with a sour stomach and gassy bowels. It has been an eye opening experience for me. I learned how much my diet, and how the right supplements, could change my problems. Now, I have more energy and stamina than ever and my stomach and bowels feel better too.

-Robin. T

I was very tired, my stomach used to bloat out so far I looked like I was 5 or 6 months pregnant. I was just very unhappy with how I looked and felt. Now, although I lost only 8 pounds, all my pants have gotten baggy on me and I am now back in my skinny clothes. My stomach isn't bloated anymore; even my fingers don't swell as much. I have more energy and my stress level has gone down a lot. I realize I have more to go, but at this rate I will have no problem getting there.

-Sharon H.

Before starting the program, I no longer fit into my skinny jeans. I was tired all the time. I had no energy or motivation to do what I had to do, let alone what I wanted to do. Now, I have more energy and I'm cleaning out my house, doing all the things I let lay. I am motivated to do them and I'm getting it done. My mind is clearer than ever. And even my eye sight is slightly less cloudy. I feel like that song "I can see clearly now, the rain is gone." and now I fit comfortably in my skinny jeans. All the pants I bought last summer (my fat jeans) are pretty huge. When I run in them I have to hold them up! I can say that changing my eating habits and not cheating, along with the supplements, has changed my life. I thank God for you!

-Patrice

My name is Mary G. and just 3 short weeks has changed my life for the better. I work retail and by 2:00 in the afternoon I would be wishing for a nap. Every day felt like a constant struggle to get through my busy day. I was taught to believe this was normal; if you worked hard, you were expected to be tired. Now, I can breeze through my day without thinking how much more I have to do before I could rest. Christmas is the most stressed time of year in my job. Usually by Christmas Day I am exhausted and sick, and really don't get to enjoy the holiday and my family. This year was much better. I have not changed my diet radically. I have followed the instructions: avoid the things that my body did not like. It is working! I have more energy, I feel better, and it is helping my marriage. My husband works second shift and I don't get to see him until after 10pm. Usually I would be so tired I really didn't want to be bothered and would get "cranky" if he wanted me to stay up and spend time with him. One girl at work noticed a difference with me. She asked me what's going on that I was in such a good mood. Thank you for all of your help! I never want to feel the way I used to. Tired, miserable and depressed were normal, but I don't want to feel that way anymore.

-Mary G.
